INDEX OF AUTHORS

Alture-Werber, Erna, 391
Anderson, Lucia E., 467
Anderson, Thomas F., 403
Artagaveytia-Allende, Ricardo C., 91
Auerbach, Helen, 587
Axelrod, A. E., 547

Baker, Herman, 387
Baker, Richard F., 569
Bard, R. C., 665
Barker, H. A., 671, 777, 781
Barki, V. H., 783
Bayan, A. P., 125
Berkman, Sam, 527
Bhat, J. V., 777
Blank, Harvey, 293
Bloom, Walter Lyon, 387
Bryson, Vernon, 423
Burkholder, Paul R., 467
Burton, Kermit A., 363

Canales, P., 125
Clark, J. Bennett, 51
Clifton, C. E., 115
Collins, Harvey Shields, 489
Coriell, Lewis L., 293
Corrigan, K. E., 397
Cowles, Philip B., 277
Crichton, P. V., 375

Davis, Franklin L., Jr., 555, 561
Davis, John B., 329
Delbrück, M., 1
Delwiche, Eugene A., 811
Demerec, M., 63
Derow, Matthew A., 191
Dienes, L., 445
Dodd, Matt C., 649
Doetsch, Raymond N., 37
Donovick, R., 125
Douglas, H. C., 25, 35
Drea, W. F., 257
Dufrenoy, Jean, 99
Dulaney, Eugene L., 305
Dyar, M. T., 821

Eagle, Harry, 59, 163
Ehrlich, John, 467
Elvehjem, C. A., 783
Evans, Florence L., 507

Fahlberg, W. J., 323
Feenstra, E. S., 697
Feinberg, Richard, 419
Feinberg, Robert, 419
Felsenfeld, Oscar, 587
Finland, Maxwell, 207, 489
Foster, Jackson W., 329
Foster, Ruth A. C., 795
Foubert, Edward L., Jr., 25, 35

Galton, Mildred M., 411
Gardner, C. H., 141
Garza Curcho, Mercedes de la, 374
Gerhardt, Philipp, 17
Golub, O. J., 509
Gots, Joseph S., 709, 723, 737
Gottlieb, David, 107, 467
Gray, M. L., 697
Gunsalus, I. C., 499

Haas, Felix, 51
Hajny, George J., 141
Hammer, J. M., 397
Hampp, Edward G., 755
Harris, Dale A., 259
Harris, J. O., 271
Hauber, Frank D., 379
Hayden, H. S., 397
Heinmets, F., 509
Henry, Jane, 527
Henry, Richard J., 527
Hillier, James, 569, 589, 603
Hoerlein, B. F., 139
Hottle, G. A., 541
Housewright, Riley D., 527
Huddleson, I. Forest, 508
Humphries, James C., 683

Johansson, K. R., 619, 635
Johnson, Marvin J., 339, 577

Karlsson, J. L., 671, 781
Kasai, George J., 89
Kelner, Albert, 157, 457
Klotz, I. M., 253, 277
Knaysi, Georges, 569
Koch, Marie L., 83
Koser, Stewart A., 89

Larsen, Arlene M., 373
Lazarus, A. S., 187, 375
Lederberg, Joshua, 695
Lerner, Edwin M., 97
Loewe, Leo, 391
Luse, Sarah, 75

McBee, R. H., 653
McClung, L. S., 665
McCoy, Elizabeth, 141
McGann, Virginia, 411
McIlroy, Alice P., 547
Mackinnon, Juan E., 91
McLeod, Charlotte, 749
Magill, Thomas P., 201
Mellody, Margaret, 253
Mellon, Ralph R., 547
Miller, Pauline A., 97, 219
Mudd, Stuart, 589, 603
Mueller, J. Howard, 97, 219

Nagler, Frederick P. O., 293
Nath, H., 783
Nozawa, M. M., 187

O'Kane, D. J., 499

Packalén, Thorolf, 143
Paine, Thomas Fite, Jr., 207, 489
Pansy, F., 125
Parker, Robert F., 75
Pearson, I. A., 397
Pelczar, Michael J., Jr., 37
Pratt, Robertson, 99
Pridham, T. G., 107, 467

Rake, Geoffrey, 293
Reilly, H. Christine, 259
Ritter, George J., 141
Ruger, Myrle, 315
Ryan, Francis J., 699

Salvin, S. B., 541
Sarles, W. B., 619, 635, 783
Sattler, Theodore H., 235
Schaffer, Norwood K., 191
Schaub, Isabelle G., 379
Schneider, Lillian K., 699
Scott, David B., 755
Scott, T. F. McNair, 293
Seastone, C. V., 323
Sevag, M. G., 709, 723, 737
Shapiro, Stanley K., 619
Shu, Ping, 577
Singh, Kesar, 339
Skinner, C. E., 679
Slanetz, Charles A., 771
Sletten, Owen, 679
Smith, William E., 589, 603
Steinman, Harry G., 163
Stone, Wilson S., 51
Stuart, C. A., 411, 419
Sugg, John Y., 201
Swan, J. C., 323
Swanson, Wilbur H., 115

Tabachnick, Joseph, 435
Thorp, F., Jr., 697
Tilley, F. W., 479
Trager, William, 195
Tucker, Harold A., 59

Ulrich, John A., 373

Vanderlinde, Robert J., 177, 357
Vaughn, Reese H., 435
Volcani, B. E., 781

Waksman, Selman A., 259
Walker, Burnham S., 191
Ward, William C., 649
Watson, Alice J., 696
Whiffen, Alma J., 283
Wickerham, Lynferd J., 363
Williams, O. B., 555, 561
Wilson, J. B., 17
Woodruff, H. Boyd, 315
Wyckoff, Ralph W. G., 755
Wyss, Orville, 51, 561

Yegian, Diran, 177, 357
Youmans, Anne S., 245
Youmans, Guy P., 235, 245

INDEX OF SUBJECTS

Acetate, as prerequisite for mucoid type of growth, 547
Acid-tolerant fungi, 679
Actidione, antibiotic from *Streptomyces griseus*, 283
Actinomycetales differentiation by carbon sources, 107
Adaptation defined as back mutation, 699
Adsorption cofactors of phage changed by mutation, 1
Agglutination, unusual type of O, 419
Anaerobic micrococci, 25, 35
Anaerobiosis indicator, methylene blue plus arsenate, 373
Anaerobiotic yeast growth in young cultures, 115
Antibiotic test of large microbial populations, 157
Antibiotics, affecting enzymes, 527
—, aureomycin, 489
—, bacitracin against *Hemophilus influenzae*, 507
—, chloromycetin, 467
—, circulin, 749
—, origin of resistance to, 63
—, streptothricin, 467
Antistreptolysin reactions, nonspecific, and cholesterol, 143
Aspergillus, citric acid fermentation by, 577
Assimilation-dissimilation balance in yeast, 115
Aureomycin, 489
Azobacter agilis mutants induced by X-rays, 671

Bacillus circulans producing an antibiotic, 749
Bacitracin against *Hemophilus influenzae*, 507
Back mutation of histidine-requiring *Escherichia coli*, 699
Bacteria, unidentifiable, gram-negative, attempt at classification, 379
Bacteriophage in *Escherichia coli* prevented by proflavine, 795
— multiplying in ultraviolet-killed cells, 403
Bacteriophaged lysates containing lysin, 683
Bacteriophages, biochemical mutation of, 1
Bacteriostasis by antibiotics, cause of, 527
— on skin by hexachlorophene, 323
Bacteriostatic efficiency affected by pH, 277
— efficiency affected by "tween 80," 245
— index, definition, 247
Bacterium anitratum n. sp., 379
Bacteroides, isolation of L type cultures, 445
— *funduliformis*, electron microscope study of, 603
Benzimidazole inhibition reversed by nucleic acid, 253
Borrelia vincentii, morphology of, 755
Brucella, synthetic medium for, 17
Butryric acid from tartrate fermentation, 435

Carbon assimilation tests for yeast classification, 363
Carbon dioxide fixation by *Rhizopus*, 329
— dioxide used as oxidant by *Clostridium*, 777
C^{14} as tracer in *Clostridium* fermentation, 777
Carbon supply of actinomycetes used in identification, 107
Catalase counteracting radiation effects in broth, 51
— necessary for prodigiosin production, 375
Cecal flora affected by diet of host, 619, 783
Cellulose fermentation, in wood, 141
— fermentation, thermophilic, 653
Chicken, intestinal flora affected by diet, 619
— with coccidiosis, intestinal flora of, 635
Chloromycetin from *Streptomyces venezuelae*, 467
Cholesterol as probable cause of antistreptolysin reaction, 143
Circulin, antibiotic from *Bacillus circulans*, 749
Citric acid fermentation, nutrient requirements, 577
— acid for colon bacteria, 89
Clostridium aceticum, nutritional requirements, 781
— *butyricum*, fermenting tartaric to butyric acid, 435
— *hemolyticum*, toxin of, 665

Clostridium lacto-acetophilum, mechanism of fermentation, 777
— *novyi*, toxin of, 665
— *tetani*, toxigenic factors for, 219
— *tetani*, *see also* Tetanus toxin
Coagulase of staphylococcus, 191
Coccidiosis affecting intestinal flora of pullets, 635
Composition of bacterial surface studied by electrokinetics, 821
Copper-sulfate-tolerant fungi, 679
Corynebacterium renale, variants of, 697

Dehydrogenase not affected by agglutinating serum, 271
— variation in drug-resistant pneumococci, 709, 723, 737
Desoxyribonucleic acid precipitated by streptomycin, 125
Diplococcus pneumoniae, enzymology of drug resistance, 709, 723, 737
Disinfectant testing, effect of subculture medium, 479
Dissocation, microbic, prevented by bovine serum, 139
— of pneumococcus affecting its drug resistance, 718
Drug resistance of pneumococcus, enzymatic data, 709, 723, 737

Eberthella typhosa, mutation to tryptophan independence, 374
Egg powder, microbiology of, 696
Eimeria tenella affecting intestinal flora of chicken, 635
Electrokinetic studies of bacterial surfaces, 821
Electron microscope study, new technique for, 569
Endocarditis, prophylactic immunization against, 391
Endotoxin of *Pasteurella pseudotuberculosis*, 187
Enzyme proteins altered in drug-resistant strains, 737
Escherichia coli, back mutation of histidine-requiring mutant, 699
— *coli*, phage formation affected by proflavine, 795

Fecal flora of chicken affected by diet, 619
— flora of chicken with coccidiosis, 635
— flora of rats affected by diet, 783
Fermenting ability detected by tetrazolium, 695
Fumaric acid made by *Rhizopus nigricans*, 329
Fungi surviving exposure to radioactive isotopes, 397
Furan, bacteriostatic action of derivatives, 649

Globulin preventing microbic dissociation, 139
Glucose purification for citric fermentation, 577
Gram stain, biochemical study of, 387
Growth by fermentative assimilation, 115
— factor in maltose, 122
— factors required by *Treponema*, 163

Heat resistance of spores compared with resistance to disinfectants, 561
— resistance of spores increased by selection, 555
Hemophilus influenzae inhibited by bacitracin, 507
Herpes zoster microscopically similar to varicella, 293
Hexachlorophene bacteriostatic for human skin, 323
Histoplasmin formation, optimal conditions for, 541
Hydrogen peroxide similar to irradiation in effect, 51

Immunization against endocarditis, 391
Influenza virus, passage of in eggs and in mice, 201
Intestinal flora of hen influenced by nutrition of host, 619
— flora of rats controlled by diet of host, 783
Irradiation of broth similar in effect to addition of peroxide, 51
Isocitric acid utilization by colon bacteria, 89
Isotopes, radioactive, effect on fungi, 397

Klebsiella with phage, producing capsule lysin, 683

L type cultures from *Bacteroides* by penicillin, 445, 589
Lactate fermentation by *Micrococcus lactilyticus*, 35
Lipids on bacterial surfaces, 821

Lysin from phage-lysed *Klebsiella* cultures, 683
Lyso!ecithin in clostridium toxins, 665
— inhibiting *Lactobacillus*, 195

Manganese inhibiting citric fermentation, 577
Medium, synthetic, *see* Synthetic medium
— for gonococcus, 83
Methyl-bis(beta-chloroethyl)amine, *see* Nitrogen mustard
Methylene blue plus arsenate, indicator for anaerobiosis, 373
Microbacterium, taxonomy of genus, 47
Microbic dissociation prevented by acetate, 547
Micrococci, anaerobic, taxonomy of, 25, 35
Micrococcus aerogenes Schottmüller 1912, 31
— *lactilyticus* nov. nom., 30
— *lactilyticus* fermenting lactate, 35
— *prevotii* n. sp., 31
— *saccharolyticus* n. sp., 31
— *variabilis* n. sp., 32
Mouse, infection by *Salmonella*, control of, 771
Mutation by peroxides, 51
— by ultraviolet irradiation, 51
— of *Azotobacter* induced by X-rays, 671
— of bacteriophages, 1
— of *Eberthella typhosa* to tryptophan independence, 374
— of *Streptomyces flaveolus* by X-rays or ultraviolet light, 457
— resulting in streptomycin resistance, 63
—, *see also* Back mutation
Mycobacterium, quantitative measure of streptomycin resistance, 177
— *tuberculosis*, growth affected by "tween 80," albumin, glycerol, and glucose, 235
— *tuberculosis*, inhibited by β-2-thienylalanine, 257

Neisseria gonorrhoeae, good medium for, 83
Nitrogen mustard causing mutations in *Escherichia coli*, 423
— mustard resistance parallel to ultraviolet tolerance, 423
Nitrophenol bacteriostasis affected by pH, 277
Nucleic acid reversing benzimidazole inhibition, 253

Oleic acid stimulating *Lactobacillus*, 195
Oxygen uptake not affected by agglutinating serum, 271

Pancreatic digest chocolate blood agar for gonococcus, 83
Paracolobactrum intermedium, antigenic relationships, 411
Paratyphoid epidemic in mice, control of, 771
Pasteurella pseudotuberculosis, endotoxin of, 187
Penicillin assay affected by human serum, 59
— effects after short exposure, 75
— inducing L type colonies, 445
— inhibiting phosphatase, 99
— precursors, 339
— resistance by gene mutation, 63
pH affecting bacteriostasis by nitrophenols, 277
Phenylacetic acid as precursor to penicillin G, 339
Phosphatase inhibition by penicillin, 99
Pleuropneumonialike organisms, electron microscope study of, 589
— organisms similar to *Bacteroides fundulifformis*, 603
Prodigiosin production linked to catalase, 375
Proflavine affecting bacteriophage and host, 795
— blocking late reaction in phage production, 795
Prolin stimulating streptomycin formation, 315
Propionibacterium pentosaceum, details of fermentation, 811
Propionic acid formation, mechanism of, 811
— acid from lactic acid by a micrococcus, 35
Psittacosis virus growth in chorioallantoic membranes, 509
Pyrrole, bacteriostatic action of derivatives of, 649
Pyruvic acid metabolism, accessory factor for, 499

Radioactive isotopes, effect on fungi, 397
Rat diet affecting cecal flora, 781
Reversion of mutation, *see* Back mutation
Rhizopus nigricans, producing fumaric acid, 329

Salmonella infection in colonies of mice, control of, 771

Salmonella respiration not affected by agglutinating serum, 271
—, see also *Paracolobactrum*
Serum preventing microbic dissociation, 139
Skin bacteriostasis by hexachlorophene, 323
Sodium acetate producing mucoid growth of *Streptococcus*, 547
Spirochetes, morphology of, 755
Spores, heat resistance compared with drug resistance, 561
—, heat resistance increased by selection, 555
Staphylocoagulase, purification of, 191
— inhibitors, 193
Staphylococcus aureus dissociation prevented by blood serum, 139
Sterilization of spore by heat and by drugs, 555, 561
Streptobacillus moniliformis producing L type colonies with penicillin, 445
Streptococcus, motile, from endocarditis, 587
— *faecalis* producing apoenzyme of pyruvate oxidase, 499
— *hemolyticus*, mucoid type dependent upon acetate, 547
— *sanguis*, immunization against, 391
Streptomyces differentiation through carbon supply, 107
— *flaveolus*, mutants by X-rays or ultraviolet light, 457
— *griseus*, description, 259
— *griseus*, nitrogen source affecting streptomycin production, 305
— *griseus* producing actidione, 283
— *venezuelae* n. sp., different from *Streptomyces lavendulae*, 467
— *venezuelae* producing chloromycetin, 467
Streptomycin, factors influencing efficiency of, 125
— action affected by various ions, 125
— affecting metabolism and enzymes, 527
— precipitating desoxyribonucleic acid, 125
— production dependent upon nitrogen source, 305
— production increased by prolin, 315
— production recognized by streptomycin-requiring bacteria, 357
—-requiring species, origin of, 215
— resistance by gene mutation, 53
— resistance due to selection, 177
— resistance of mycobacteria, quantitative method, 177
—-resistant and streptomycin-requiring strains, comparison of, 207
Streptothricin from *Streptomyces venezuelae*, 467
Succinic acid as precursor of propionic acid, 811
Surface of bacteria studied by electrokinesis, 821
Synthetic medium for actinomycetes, 108
— medium for *Aspergillus* producing citric acid, 578
— medium for *Brucella*, 17
— medium for hemolytic streptococcus, group C, 548
— medium for *Histoplasma capsulatum*, 541
— medium for *Penicillium chrysogenum*, 339
— medium for *Saccharomyces cerevisiae*, 115
— medium for *Streptococcus faecalis*, 499
— medium for *Streptomyces*, 108, 305

Tartrate fermentation to butyric acid, 435
Taxonomy of *Actinomycetales*, 107
— of anaerobic micrococci, 25
— of *Microbacterium*, 47
— of *Streptomyces*, 107
— of unidentifiable, gram-negative bacteria, 379
— of *Veillonella*, 25
Tetanus toxin, factors controlling production, 97
— toxin production, nutrients for, 219
Tetrazolium to detect fermenting ability, 695
Thiophene, bacteriostatic action of derivatives, 649
Thread agglutination indicating O inagglutinability, 419
Treponema, nutritional requirements of, 163
— *pallidum*, morphology of, 755
Trichophyton, vitamin requirement of, 91
Toxigenic factor for *Clostridium tetani*, 219
Toxins of *Clostridium novyi* and *Clostridium hemolyticum*, 665
"Tween 80" bacteriostatic for *Mycobacterium*, 235
— changing the efficiency of various bacteriostats, 245

Ultraviolet-irradiated broth retarding bacterial growth, 51
—-killed cells capable of producing bacteriophage, 403
— tolerance parallel to nitrogen mustard tolerance, 423

Varicella microscopically similar to herpes zoster, 293
Veillonella, taxonomy, 25
Vibrio fetus, medium for, 508
Virulence of hemolytic streptococcus dependent upon acetate, 547
Virus of psittacosis, mode of multiplication, 509
—, *see also* Bacteriophage
Vitamin requirement of *Trichophyton*, 91

Wood, cellulose fermentation in, 141

Yeast classification through carbon assimilation, 363
— growth anaerobic during first hours, 115

Zinc requirement of *Aspergillus*, 577
